

TMMi Professional

Assess test maturity, build the business case, drive improvement at the process level.

2 DAYS

TMMi

EXAM INCLUDED

THE COURSE

What you will learn.

TMMi Professional certifies you in the world's leading model for test process improvement. Two days covering the model end to end: its five maturity levels, the process areas that define each one, and the formal and informal assessments used to measure where an organisation's testing actually stands. It runs on the latest TMMi Professional syllabus, released June 2026.

TMMi works in sequential delivery, in Agile and in DevOps, and the course covers all three, along with the model's link to artificial intelligence and quality engineering. Expect a mix of lecture and a lot of practical exercise.

You leave able to assess test maturity objectively and turn the findings into improvement recommendations leadership will actually fund, positioning testing as a strategic capability rather than a cost centre. The certificate is also the knowledge prerequisite for becoming an accredited TMMi assessor or a Certified TMMi Test Process Improver. The official exam is included and the course is HRD Corp claimable.

Who should attend

- Test managers and heads of QA building the case for investment
- Test process improvers and members of a Test Process Group
- Test consultants advising clients on test maturity
- Business stakeholders sponsoring quality improvement programmes
- Anyone working towards accreditation as a TMMi assessor
